Know Before You Go

Startup

Problem Statement

People often find it difficult to locate the perfect venue for their social outings at clubs and restaurants. Because of the following challenges, such as: –

Crowd Density

Users lack access to real-time crowd density information, which is crucial for making informed decisions about where to go.

Limited Insights on Daily Offers

Users often miss out on discovering venues that have special performances or promotions happening on a particular day leading to non satisfactory customer experience.

Outdated Information

Users often encounter reviews and ambiance descriptions that are no longer accurate, leading to disappointment upon arrival.

Lack of Real-Time Pricing

Users struggle to find current pricing such as club entry fee for special days or offers, making it difficult to make informed decisions about where to go.

Startup

Solution Overview

Here how our platform fixes all the issues that customer faces: –

Real-Time Crowd Monitoring

By leveraging a combination of sensor data, user input, and AI-powered analysis, the platform enables users to make informed decisions about where to go.

Daily Offers & Promotion insights

Our platform highlights venues with special offers and performances for the day, helping users discover exciting options tailored to their preferences.

Up-to-Date Venue Information

We aggregate real-time data from users and venues, ensuring that reviews, ambiance descriptions, and other key details are current and accurate.

Real-Time Pricing

Our platform displays live pricing for special events and daily offers, allowing users to see exactly what they will pay before they arrive.

Market Opportunities

The growing demand for urban social outings creates a strong market opportunity for our platform, by connecting city dwellers to diverse entertainment and social experiences.

Some Use Cases

Party Clubs

- Real-Time Crowd Monitoring
- Daily Promotions and Events
- Accurate Pricing Information
- Up-to-Date Reviews and Insights
- Booking Capabilities
- User Engagement Features

Restaurants

- Real-Time Table Reservations
- Current Menu and Pricing Information
- Daily Specials and Promotions
- Personalized Recommendations
- User Reviews and Ratings

Salons & Spa

- Real-Time Appointment Booking
- Service Availability and Pricing
- User Reviews and Ratings
- Personalized Recommendations
- Promotions and Discounts
- Staff Profiles and Availability
- Appointment Reminders

Benefits for Businesses

Identifying Customer Preferences

By analyzing user data and feedback, businesses can better understand what services or menu items are most popular. This insight allows them to tailor offerings to meet customer demand.

Streamlined Operations

Automated appointment reminders and cancellation management reduce administrative burdens, allowing staff to focus on providing excellent service.

Enhanced Visibility & Promoting Relevant Offers

The platform will help businesses identify which promotions resonate most with their customers, allowing them to create targeted marketing campaigns that drive sales during off-peak hours.

Competitive Landscape

Comparison points with competitors like Google Search and existing crowd management apps.

Personalized Recommendations

Our platform utilizes AI algorithms to provide personalized venue suggestions based on user preferences, past behavior, and real-time crowd data. This level of customization enhances user satisfaction by tailoring options specifically to their interests.

Daily Promotions and Events

Incrowd can curate a daily digest of the best promotions and events happening across the city. We partner with venues to feature their daily specials, happy hours, live music nights, and other events. Utilize push notifications or in-app alerts to deliver timely updates to users.

Real-Time Crowd Availability

Our platform provides users with real-time data on crowd density within venues, allowing them to make informed decisions about where to go based on current occupancy levels. This dynamic engagement offers a more accurate understanding of venue quality compared to static ratings.

Integrated Booking System

Unlike Google Search, which primarily directs users to external sites for bookings, our platform offers a seamless booking experience for tables at restaurants or entry passes for clubs. This convenience simplifies the process for users and encourages them to use our platform as their go-to resource.

Business Insights and Analytics

Our platform provides businesses with valuable insights into customer behavior and preferences through analytics derived from user interactions. This data can help venues make informed decisions about marketing strategies and operational improvements, which is not a focus of Google Search.

Community-Centric Approach

By building a community around venue discovery and experiences, your platform encourages users to share their experiences and recommendations, creating a sense of belonging that is not typically fostered through a search engine.

What we offer v/s Others

Feature	InCrowd	Google Search	Competitor A
Real-time Crowd density	Yes	Limited	No
Daily Events & Offers	Yes	No	No
User Ratings	Yes	Yes	Yes
Booking Options	Yes	No	Yes
Personalised Search Results	Yes	No	No

Business Model

Freemium Model

Basic access to essential features is free; premium features like Exclusive deals and Enhanced booking options with cancellation available via some nominal fee.

Promotional Partnerships

Collaborations with venues for exclusive deals and promotions that can drive traffic and increase visibility.

Advertising Revenue

Integration of Google AdSense allows for additional revenue through targeted ads displayed on the platform, generating income based on clicks and impressions.
